

Overview of the TFS Website

This document is a short overview of the technology and functionality introduced in the 11/2025 release of the TFS website. The foundation for these changes was introduced in the previous release but not leveraged. These changes were originally designed to help with our current tablet curriculum, but will prove key to our ability to simply add alternative platforms to the website while continuing to server our current tablet community.

Note that the current system is constantly evolving as we add more applications, external links, and respond to request from our communities to add additional information. **This snapshot is from 11/11/2025.**

Website Entry

There are 2 paths into the TFS website. The front end, which is used for recruiting and fund raising and the backend, used for training.

Entry to the front end of the TFS website is through the Home Page and will be documented soon as it might be changing.

Entry to the backend TFS website is through either the Student or the Links for Seniors app. These apps call the “*Learning Center - Fire Tablet*” which calls the “*Learning Communities*” Post or “*Links App*” Page which calls the “*Links for Seniors Links*” Post . Both entry pages present the “*Community News*” Post.

Cookies

A cookie (tfs_cohort) is defined and initialized to “Guest” in the Wordpress functions.php file. When the student chooses a community in the “*Learning Communities*” Post, it routes a student to the the students learning community. Upon entry to the learning community page, the cookie is set to that communities name. This allows us to customize the students experience based on the community that they belong to. It also positions us to host “Guest” participants outside of those belonging to a learning community if we choose to implement this; it could also be used as an indicator that someone entered the system from the frontend.

```
30 function enable_custom_cookie() {
31     if (!isset($_COOKIE['tfs_group'])) {
32         setcookie('tfs_group', 'Guest', time()+60*60*24*90, '/'); //set cookie expiration to 90 days
33         // FOLLOOWING COOKIE NOT CURRENTLY USED CAN BE USED OR RENAMED
34         setcookie('tfs_common', 'Common', time()+60*60*24*90, '/'); //set cookie expiration to 90 days
35     }
36 }
37 add_action('init', 'enable_custom_cookie');
38
39 //Added code to enable session varilable
40 function register_my_session(){
41     if( ! session_id() ) {
42         session_start();
43     }
44 }
45
46 add_action('init', 'register_my_session');
47
```

Overview of the TFS Website

Redirection

When entering through the Student App, the “Learning Community” Post is called. Before entering the student’s learning community Post, the [Redirection plugin](#) is used to check if the student has previously logged in as part of a learning community by inspecting the value of the tfs_cohort cookie. If so, they are redirected to the appropriate learning community landing post. If not, they are sent to the “*Learning Communities*” Post where they can choose a learning community or continue as a “Guest”. If they chose to enter as a guest, they are sent to the “Links for Seniors Links” Post. This is not something we currently allow but it allows us to in the future if we decide to.

When entering through the Links for Seniors App, the current cookie value is simply passed though. If the student has previously logged in through the Student App their cookie will still be available for us to use to customize their experience.

Redirection Rules

<input type="checkbox"/> URL	Code	Hits	Last Access	Comment
<input type="checkbox"/> change this to redirect to a different website /entry/ https://techforseniors.info/fire-learn	301	0	-	Used for testing; disabled
<input type="checkbox"/> Implement direct access if community cookie is CatholicCare /community/learning-communities/	307	51	November 8, 2025	Used for automatic routine to students learning community
<input type="checkbox"/> Implement direct access if community cookie is Southaven /community/learning-communities/ Edit Delete Disable	307	52	November 11, 2025	Used for automatic routine to students learning community
<input type="checkbox"/> Implement direct access if community cookie is Yorkshire /community/learning-communities/	307	18	November 8, 2025	Used for automatic routine to students learning community
<input type="checkbox"/> Implement direct access if community cookie is Sabathani /community/learning-communities/	307	36	November 10, 2025	Used for automatic routine to students learning community
<input type="checkbox"/> Implement direct access if community cookie is Monarch /community/learning-communities/	307	48	November 9, 2025	Used for automatic routine to students learning community
<input type="checkbox"/> Implement direct access if community cookie is Riverview /community/learning-communities/	307	32	November 8, 2025	Used for automatic routine to students learning community

Overview of the TFS Website

Categories and Tags

Only Posts can be assigned Categories and Tags.

We have chosen to restrict Posts to a single Category. The URL for Posts contain the Category as part of their address. When a Post is assigned to multiple Categories, one of the Categories is selected as the primary and the others are redirected to the URL with the primary Category name. Note that changes to the Category will likely impact the address of the Post.

Current Categories

<input type="checkbox"/> Name ↕	Description ↕	Slug ↕	Count ↕
<input type="checkbox"/> Admin	Material on setting up and maintaining the tablets used by our Cohorts	admin	2
<input type="checkbox"/> — Site Documentation Edit Quick Edit Delete View	—	site-documentation	2

Backend TFS Website Flow

Built for *Flexibility* and Growth

The Links for Seniors TFS environment is meant to help you continue learning about your tablet and the world wide web.

Plugins

The following Wordpress Plugins are used within the TFS Website:

Website Security

The following plugins are used to implement the TFS Website security:

- [Akismet Anti-spam: Spam Protection](#) - possibly the best way in the world to protect your blog from spam
- [Independent Analytics](#) - User-friendly website analytics built for WordPress
- [Jetpack](#) - Security, performance, and marketing tools made by WordPress experts
- [UpdraftPlus - Backup/Restore](#) - Backup and restore: take backups locally
- [Wordfence Security](#) - Anti-virus, Firewall and Malware Scan

Website Functionality

The following Plugins are used to extend Wordpress functionality:

Overview of the TFS Website

- [Insert Pages](#) - used to display a Post inside another post; useful for creating class notes Posts by including other Posts.
- [LiteSpeed Cache](#) - High-performance page caching and site optimization from LiteSpeed. Also used to clear cache if needed. Potential performance improvements?
- [PDF Embedder](#) - Embed PDFs straight into your posts and pages, with flexible width and height.
- [Posts Table Pro](#) - Display any WordPress content in an instant data table with powerful search, sort and filter capabilities. Used extensively to display a list of content based on categories and tags; Potential performance improvement with lazy load?
- [Redirection](#) - support rerouting of URL requests and manage any 301 redirects and monitor 404 errors
- [Jetpack VideoPress](#) - High quality, ad-free video.
- [Kadence Blocks](#) – Gutenberg Blocks for Page Builder Features - Create custom column layouts, backgrounds, dual buttons, icons etc.
- [WP Image Zoom](#) - Add zoom effect over the an image
- [WPCode Lite](#) - add code snippets in WordPress. Insert scripts to the header and footer, add PHP code snippets with conditional logic. Used for cookie and session variable definitions
- [WPFront Scroll Top](#) - Adds a lightweight and smooth "Scroll to Top" button
- [AppMySite](#) - enables WordPress & WooCommerce users to sync their websites with native iOS and Android apps. **Used to build Student App.**

Deactivated on production system

(but useful in Staging to facilitate content delivery)

Many of these plugins are used to create content but not necessary at run time. They should be reactivated in Staging environments

- [Broken Link Checker](#) - find and fix broken links on your entire site
- [Child Theme Configurator](#) - used to extend Wordpress functionality without impacting system files such as functions.php where cookies and session variables are defined
- [File Upload Types by WPForms](#) - allow WordPress to accept and upload any file type extension or MIME type, including custom file types.
- [Post Type Switcher](#) - A simple way to change a post's type in WordPress
- [Starter Templates by Kadence WP](#) - Launch a beautiful website with the power of AI or using our Pre-Designed Templates.

Overview of the TFS Website

- [WappPress](#) - WordPress mobile app plugin that makes it easy to build android apps for WordPress website, **Used to build Link for Seniors app**
- [WordPress Importer](#) - Import posts, pages, comments, custom fields, categories, tags and more from a WordPress export file.
- [Yoast Duplicate Post](#) - for cloning posts and pages, including the powerful Rewrite & Republish feature.

Potentially Removable - still investigating

- [Easy Post Types and Fields](#) - Create custom post types, fields and taxonomies. Disabled while looking for run time impacts and scanning for usage.
- [Embed Any Document](#) - Embed Any Document WordPress plugin lets you upload and embed your documents easily in your WordPress website. This is used in the “Disabling Tablet Parent Control” but currently not working

Post Tables

The Post Tables Pro plugin is used extensively to display lists of content organized by Categories and Tags, most are self explanatory. Here is the current list:

- [Active Community](#) - Lists all Posts with the “*ActiveSession*” Tag (not currently used)
- [All Communities](#) - Lists all Posts in the “*Communities*” Category (not currently used)
- [Links Your Tablet](#) - Lists all Published Posts with “*Tablet Info*” Tag (searchable)
- [Fun and Games](#) - Lists all Posts with the “*Games*”, “*Music*”, “*Travel*”, “*Photo*” or “*Maps*” Tags
- [All Community News](#) - Lists the Community News Post (not currently used)
- [Courses Conference](#) - Lists all Posts with Category “*Courses*” and Tag “*Intro*”
- [Sparks](#) - List all Published Posts with “*Spark*” Tag
- [Search by Category](#) - List all Posts with a chosen Category (searchable)
- [Search by Tag](#) - Lists all Posts with a chosen Tag (searchable)
- [Search Apps](#) - List all Published Posts with Category “*apps*” (searchable)
- [Tablet Configuration](#) - Lists all Posts with Category “*Tablet Configuration*”
- [Site Documentation](#) - Lists all Posts with Category “*Site Documentation*”
- [All Pages](#) - Lists all Pages

Overview of the TFS Website

- **All Posts** - Lists all Posts (searchable)
- **Courses** - Lists all Posts with Category “Courses” and Tag “Intro”
- **Alexa Course Lessons** - Lists all Posts with Category “Courses” and Tag “Intro”
- **Getting Started Course Lessons** - Lists all Posts with Category “Courses” and Tag “Alexa” (uses a “Start Lesson” button)
